PREMIUM MARINE FUELS

Cleans, Protects & Enhances

Slipstream® Diesel

PREMIUM MARINE FUELS

Elevates your boating experience to a new level. Slipstream® diesel is safer, cleaner, and with the upgrade in cetane, delivers turbo-charged type performance. Slipstream® helps to improve your boat's cold starts while reducing misfiring, hesitation, and harmful emissions. Used regularly, Slipstream® will provide a noticeable boost in the performance and extend the life of your fuel system. Bottom line: Slipstream® provides the safest, most enjoyable boating experience imaginable.

Slipstream® Gasoline

PREMIUM MARINE FUELS

Ensures the highest standard of quality and performance in every gallon of fuel consumed. It corrects the challenges commonly linked with ethanol-blended fuels - managing moisture, preventing phase separation and octane loss, and reducing carbon deposits that can build up through normal operation. Slipstream® improves the quality of marine gasoline by adding powerful cleaning agents that prevent performance loss due to the accumulation of carbon deposits, gum and varnish in the fuel system.

ETHANOL PREVENT DEFENSE

- Safely manages water contamination, helping to protect against phase separation and resulting octane loss.

CETANE ENHANCEMENT

- Helps reduce misfiring, hesitation and emissions, while improving cold starts.

NEXT GENERATION DETERGENTS

- Keeps injectors clean maintaining optimum engine performance, reducing deposits and emissions, and maximizing fuel economy.

STABILITY PROTECTION

- Helps preserve and maintain fuel stability against time and temperature, prolonging the life of your fuel. Mandatory for off-season storage.

CORROSION PROTECTION

- Protects fuel system components and tanks from corrosive activity associated with both gasoline and diesel.

LUBRICITY IMPROVER

- Protects all fuel system componentry reducing pump and injector failure.
